DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/22/05 and claims previously filed on 11/22/05 has been entered.

Response to Arguments

Applicant's arguments, filed 11/22/05 have been fully considered and are persuasive. After further consideration and searching, the Examiner agrees with the argument made that the Blank reference does not explicitly teach the determination of attribute information of a synthesized pixel based upon the attributes of a source and a destination pixel and the transmissivity. Please see more below.

Allowable Subject Matter

Claims 1-5, 8, 10-14, 17, 19-23 and 26 are allowed.

The following is an examiner's statement of reasons for allowance: Blank does teach the synthesizing of pixels, but this is only based upon the transmissivity of the layers of images being synthesized and not upon all three criteria as being claimed.

Other references of record also teach the concept of overlapping of images, but again, the transparency level associated with the images is the determining factor in the attribute information of the resulting synthesized image (and its pixels). No other prior art of record have been found to teach the determination of attribute information of a synthesized pixel based upon the attributes of a source and a destination pixel and the transmissivity.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. DeLeeuw (U.S. Patent No. 6,359,631), Kay et al (U.S. Patent No. 6377269) and Shimizu (U.S. Patent No. 6,744,430).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yixing Qin whose telephone number is (571)272-7381. The examiner can normally be reached on M-F 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Coles can be reached on (571)272-7402. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
